TWO CEILING HEIGHT OPTIONS

What does this mean?

At urban**pods**, we provide two height options for our pods: a standard internal height of 2.3 meters and a lower height option of 2.1 meters. The standard height requires the pod to be positioned at least one meter away from the boundary, while the lower height permits you to place it closer within the boundary.

NOW TIME TO PICK YOUR FLOORING

Make your pod feel like home

Palio Trade by Karndean offers a collection of contemporary luxury vinyl wood and stone designs cut into individual tiles and planks.

A convenient choice in any room, there highly realistic designs look just like the natural materials they're inspired by but without any of the practical downsides. Comfortable underfoot, easy to keep hygienically clean and hard wearing enough to cope with the busiest of homes.
